REPORT 2022 Tracking OECD Donor Funding for Sexual and Reproductive Health and Rights

This is the executive summary of the 2022 Donors Delivering for SRHR report, available at: [www.donorsdelivering.report](http://www.donorsdelivering.report)

## TRACKING DONOR SUPPORT TO SRHR AS PART OF THEIR ODA

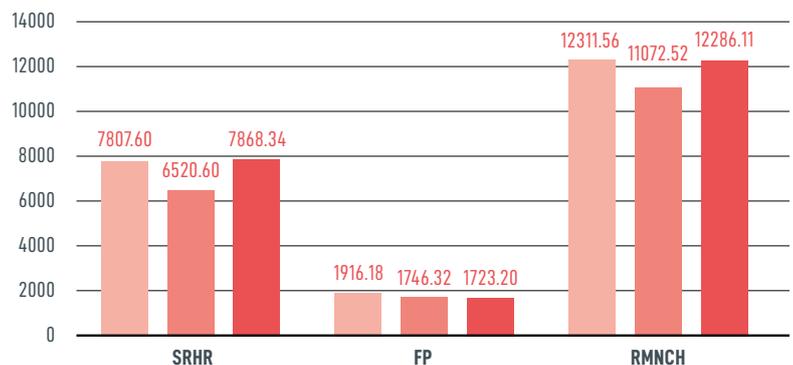

The Donors Delivering for SRHR Report is an annual publication about the state of global funding for SRHR, RMNCH, and FP. Specifically, it tracks the total funding support and the share of ODA that OECD DAC donors dedicate to these areas. The report does this by combining the Muskoka 2 Methodology, developed by the LSHTM, with tracking donors' ODA allocation to SRHR. The findings of the current report are based on ODA disbursements in 2020 as the most recent confirmed data available.

## OVERALL SRHR SUPPORT INCREASED IN 2020

In 2020, after a drop in disbursements in 2019, donors' SRHR funding was back to the level of 2018. This is mainly due to several large donors increasing the total amount of their SRHR disbursements, including the US, Canada, Germany, Japan, and the EU Institutions.

SRHR, FP and RMNCH total disbursements trend for all OECD DAC donors in million USD, 2020 constant prices, for 2018 2019 2020

## MANY LARGE DONORS FAILED TO PRIORITISE SRHR IN THEIR ODA IN 2020

Almost half of OECD DAC donors (14/30) spent <2% of their ODA on SRHR

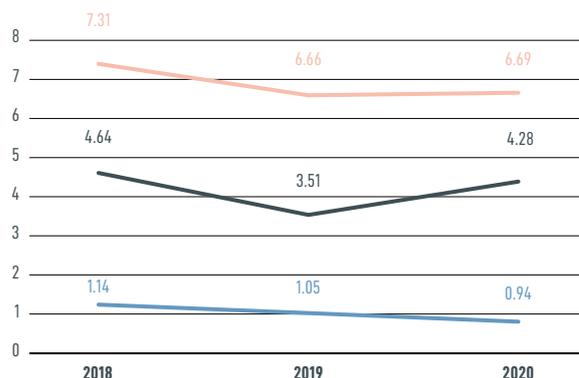

Only 5 out of 30 donors spent >4% of their ODA on SRHR

Disappointingly, the latest data confirms a trend from previous years of large donors failing to prioritise SRHR funding in their ODA. This means that many countries who contribute the highest amount of SRHR funding in real terms only allocate a comparatively small percentage of their Official Development Aid to supporting SRHR. Accordingly, donors such as Germany, the EU Institutions, or France, who are some of the leading donors in 'real terms', lag behind smaller donors such as Iceland and the Netherlands when it comes to prioritising SRHR by allocating a larger percentage of ODA to SRHR.

The US is the biggest donor by far (both in total and relative terms) with almost 12% of ODA spent on SRHR. Other top donors (relative to ODA) include Canada, the Netherlands, Iceland, and Sweden, all spending between 4.09% and 8.02% of their ODA on SRHR.

## ONLY 4.3% OF ALL ODA WENT TO SRHR

SRHR, FP and RMNCH as percentage of ODA for all OECD DAC donors - trend as a percentage of total ODA, 2018 - 2020

## THE EU: STRONG ON ODA BUT NOT ON SRHR FUNDING

While jointly the largest ODA donors (accounting for more than 50% of all ODA), the EU Institutions and EU Member States taken together account for only 25.12% of all donors' SRHR disbursements in 2020.
